

IP analytics and data visualizations: the art of effective communication

Chris Harrison, Head of IP Analytics and Data Science

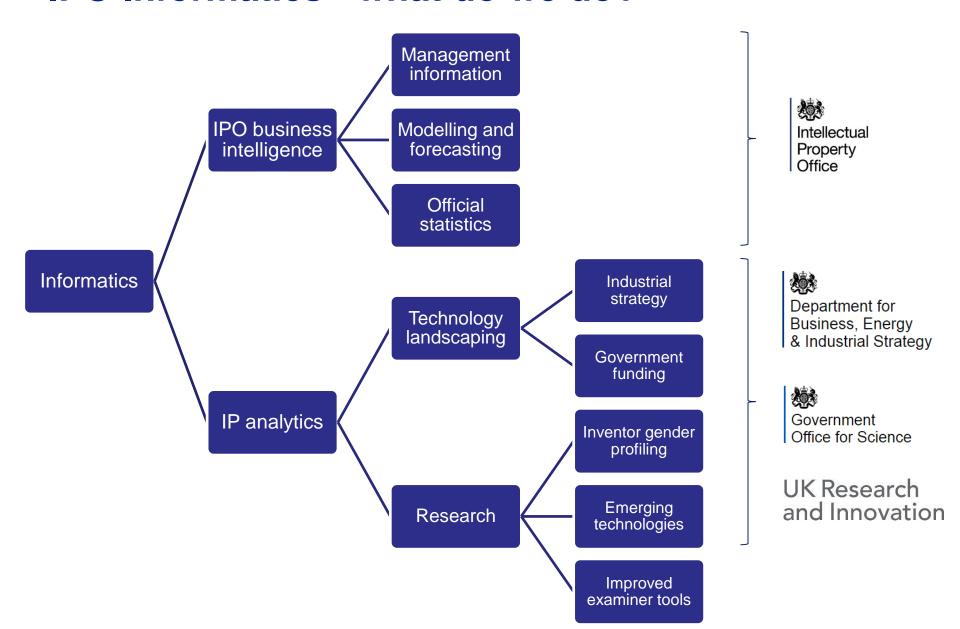

OUR ROLE

MAKING LIFE BETTER THROUGH IP

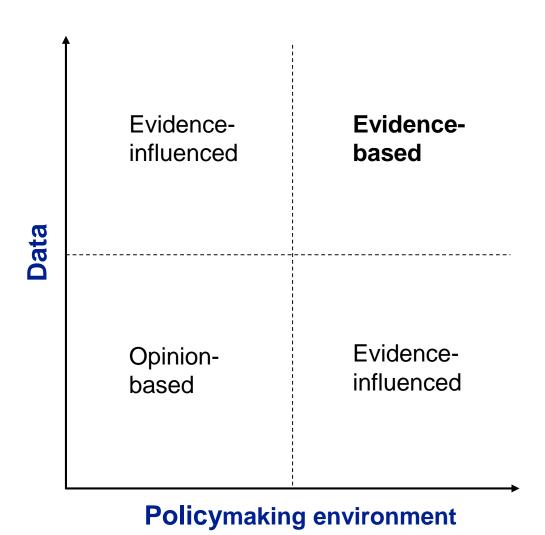

OUR AMBITION

TO BE THE BEST IP OFFICE

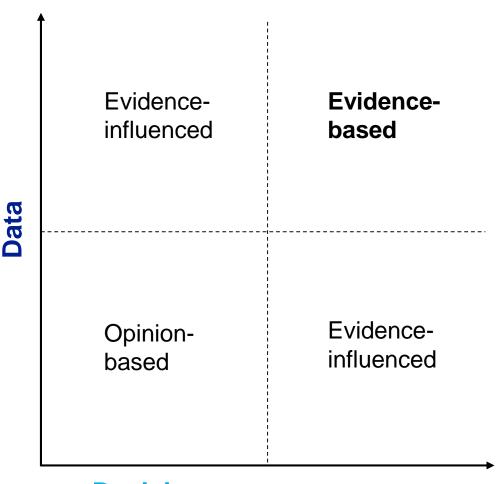

IPO Informatics - what do we do?

Why evidence-based policymaking is important?

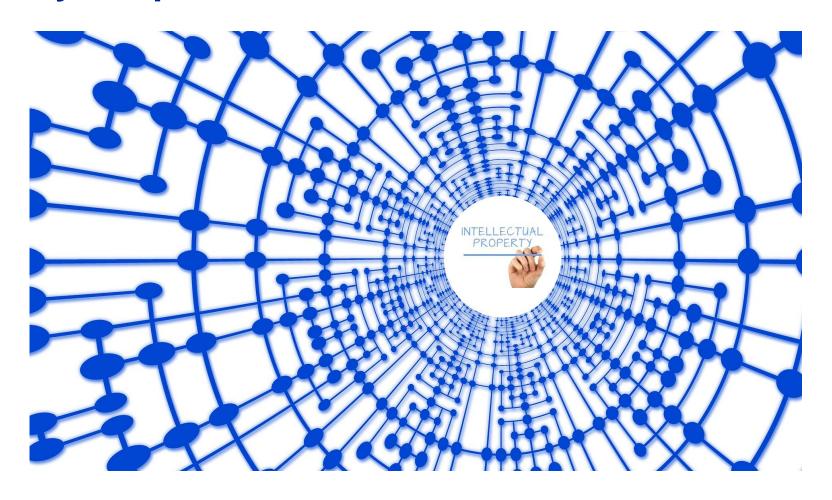

Why evidence-based decision making is important?

Decision making environment

Why the problem exists?

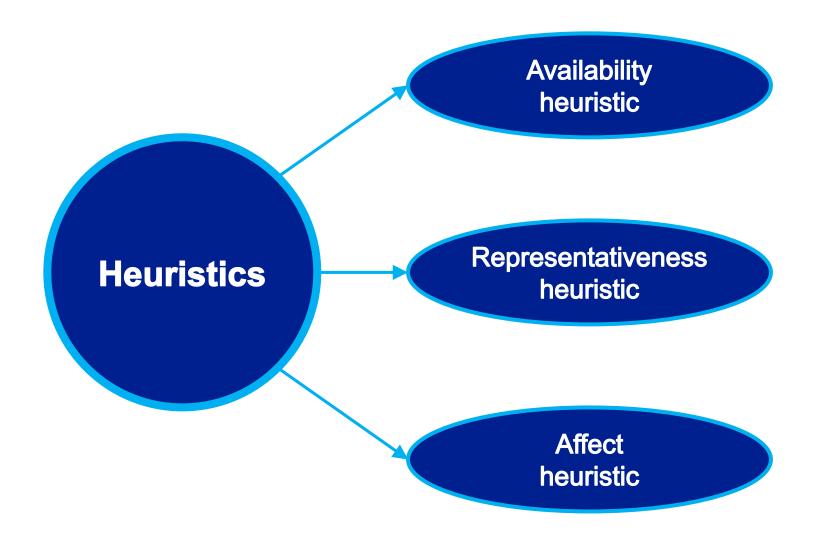

IP is complex

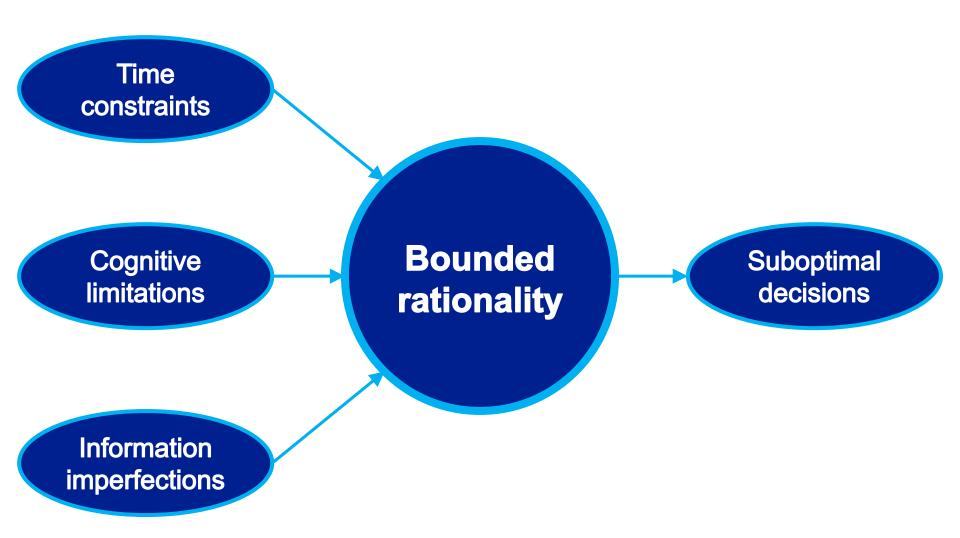

IP data is complex

Analysis of IP data is full of caveats, assumptions and ambiguities

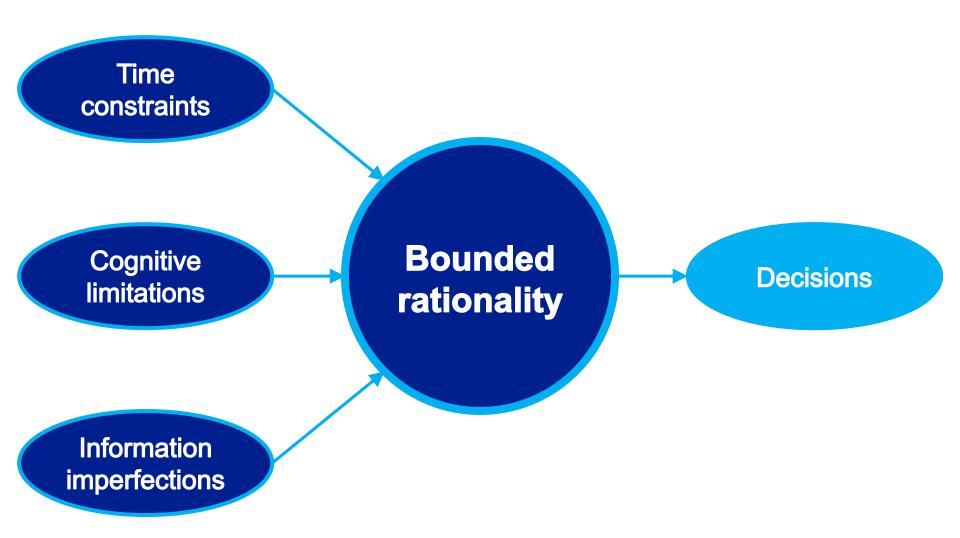

The science behind it

The science behind it

The science behind it

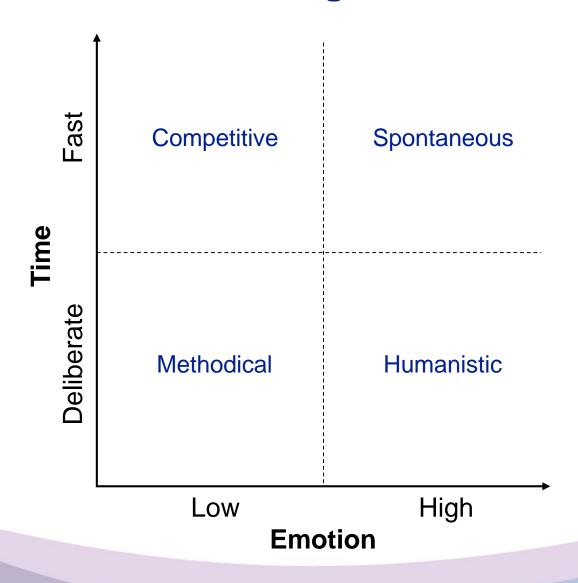

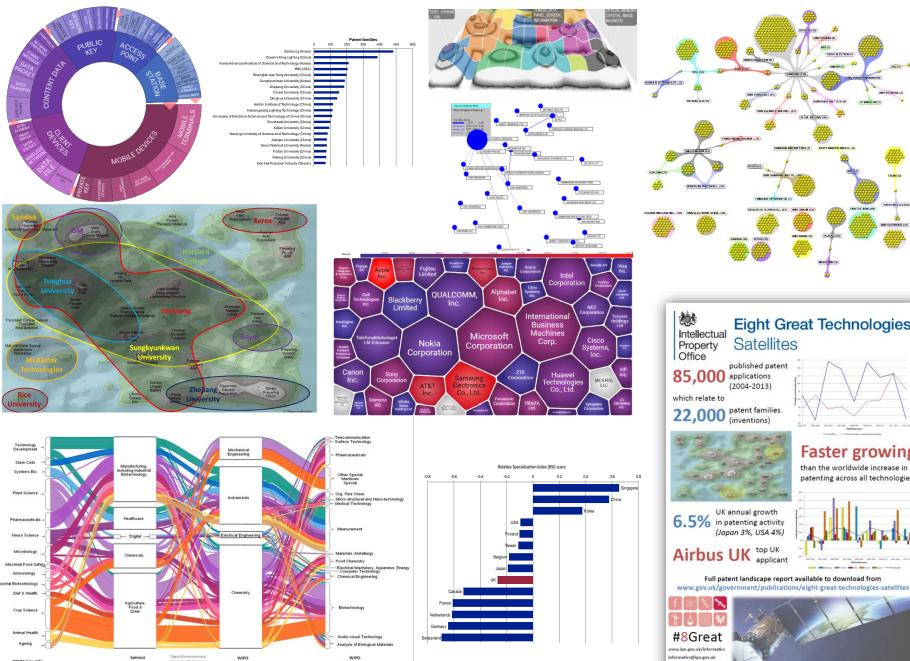

How do we try to communicate effectively?

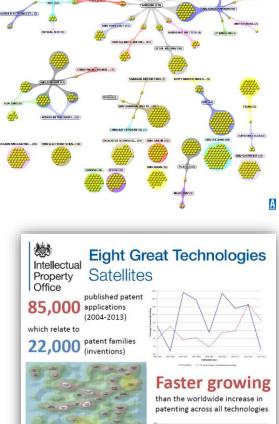

- ➤ The importance of IP education
- The question behind the question
- ➤ The power of advanced analytics software
- ➤ The role that visualisations play
- ➤ The feedback loop

Policymakers want to engage with the decision ... not necessarily the data

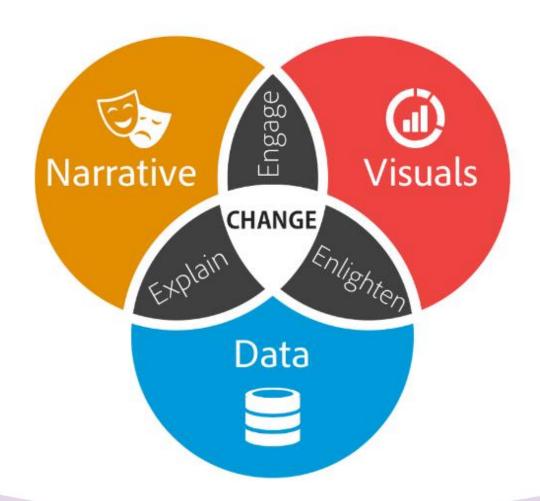

Effective decision making

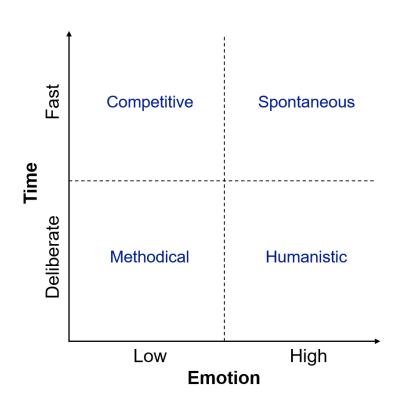

Data storytelling

Data storytelling

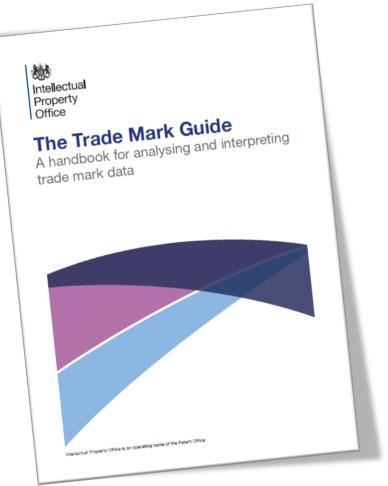

People hear statistics, but feel stories

https://www.gov.uk/government/publications/the-trade-mark-guide

February 2015

March 2019

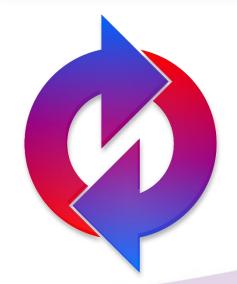

In summary...

My final thoughts

The problem remains unsolved

- ➤ What more can we do?
- ➤ What more should we do?
- ➤ Are we trying to achieve the unachievable?
