BizDash BizInt Smart Strategy Dashboards

Don't have time to learn and use the BizInt Smart Charts tools yourself?

BizDash is a service offered by the BizInt team. We use BizInt Smart Charts tools with supported drug pipeline, clinical trial and biomedical literature databases to create data-centric reports and visualizations targeted to your analytic needs.

The BizInt team works with you to understand your needs, execute the right search strategy (using your data subscriptions) and then create tailored reports and/or visualizations.

BizDash is designed to help BizInt Smart Charts customers maximize their software and data licenses and to "jump-start" increased use of the tools.

BizDash projects are included in most BizInt licenses. For those who are not currently BizInt customers, the cost of BizDash projects is typically \$1,500-\$5,000.

Software for
Business Intelligence

BizInt Smart Charts

BizInt Solutions, Inc.

600 First Avenue
Seattle, WA 98104

BizInt Smart Charts sources

Clinical Trial Registry Databases *

US NIH	ClinicalTrials.gov
WHO	International Clinical Trials Registry Platform (ICTRP)
EU EMA	EU Clinical Trials Register (EudraCT)

Clinical Trial Databases (Subscription)

Citeline	TrialTrove
Springer	Adis Clinical Trials Insight
Clarivate	Cortellis Clinical Trials Intelligence

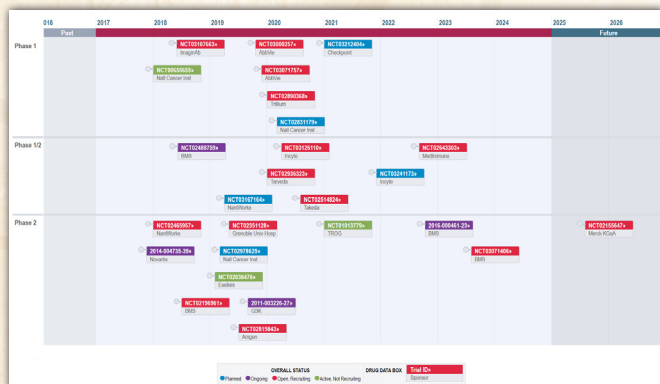

Biomedical Literature Databases

Medline	PubMed, ProQuest Dialog, Ovid, STN (New & Classic)
BIOSIS	ProQuest Dialog, Ovid, STN (New & Classic)
EMBASE	ProQuest Dialog, Ovid, STN (New & Classic)

Drug Pipeline Databases (Subscription)

Citeline	Pharmaprojects
Clarivate	Cortellis, Integrity
Adis	R&D Insight
IMS	R&D Focus

* Clinical trial registry databases are supported for all customers. All other databases require a subscription for use with BizDash or BizInt Smart Charts tools.

BizDash BizInt Smart Strategy Dashboards

How can BizDash help boost our CI?

- **Obtain a data-centric overview of the drug and trial landscape** – the BizInt team can prepare a “dashboard” of reports and visualizations (based on pipeline, clinical trial, and literature data) for a particular therapeutic area, target or company.
- **Quickly respond to urgent requests** – BizDash can offer your team additional bandwidth to rapidly create reports and PowerPoint presentations.
- **Answer new and challenging questions** – work with BizDash to glean new insights from the data.
- **Get started using the tools yourself** – the BizInt team will help you incorporate new reports and visualizations into your workflow by writing specific “recipes” and providing focused training.

In addition to having over 20 years of experience with drug pipeline, clinical trial and biomedical literature databases, the BizInt team is expert in the use of BizInt Smart Charts tools. These tools can quickly perform tasks such as:

- identify and integrate records for the same drug or trial from different databases.
- extract the highest phase for specific indications.
- create visualizations in PowerPoint with links to backing records.

BizInt Smart Charts — tools to create tables, integrate & visualize data

For over 20 years, BizInt Smart Charts software has been used by analysts in top pharmaceutical and biotech companies to create reports and visualizations to support their decision-making. These tools enable BizInt to quickly create Dashboards for you. Or, you can use BizInt Smart Charts software to create your own reports.

BizInt Smart Charts

Drug Development Suite

The **BizInt Smart Charts Drug Development Suite** is Windows-based software for creating tabular reports from clinical trial, drug pipeline, and biomedical literature databases. With BizInt Smart Charts Drug Development Suite, you can:

- **Import your search results:** BizInt Smart Charts knows how to process your data — no more copy/paste or maintaining Excel macros! Quickly create tabular reports containing text, subtables and images.
- **Customize your report:** Change displayed fields at any time; sort and add your own columns. Save your customizations as Chart Templates.
- **Update reports and identify changes:** You can update a previous report with new information. New records and updated data are automatically flagged.
- **Distribute reports to your clients and colleagues:** Export to Word, Excel, PDF and HTML. Reports can contain table and backing records, with links to original sources for more details.

dashboard [noun]

a visual display of the most important information needed to achieve one or more objectives.

The BizInt Smart Charts product family includes many tools to help integrate data from multiple sources. When you combine search results from different databases, BizInt Smart Charts knows how to combine similar fields from each source.

These tools help identify related records in your report:

- **Identify Common Drug Names** examines the drug names and synonyms in your drug pipeline report and creates a network of related products.
- **Identify Common Trial ID** matches clinical trial IDs between records and creates a “Common Trial ID” column.

BizInt Smart Charts

Reference Rows™

BizInt Smart Charts Reference Rows™ is a utility included with BizInt Smart Charts Drug Development Suite. Related source records representing the same drug or clinical trial are summarized in a single “reference row” based on your database rankings and rules.

VantagePoint – Smart Charts Edition (VP-SCE) is a special version of Search Technology’s VantagePoint software, customized for use with BizInt Smart Charts. VP-SCE offers BizInt Smart Charts users powerful features for cleaning-up and filtering data in multi-database reports.

Used in conjunction with BizInt Smart Charts Reference Rows, VP-SCE helps create truly meaningful multi-database reports and visualizations from clinical trial and pipeline databases.
